Sprint Plan Template

Week	Purpose	Weekly Tasks and Goals
7	Cleaning and EDA	- Go through standard EDA i.e. looking for NA data - Decide which columns are not necessary to my project as it is a large dataset - -Visualise the data to get a feel of it.
8	Initial Models	- Start with initial models learnt in ML classes - Understand results and see if the null hypothesis is false, if it is form new question/s for the dataset
9	Further Cleaning	- I will have a better idea of the data and its strengths/ limits - Merge any further data if needed - Clean the data further where needed
10	Final Models	- Start Creating presentation - Finish the models and form a conclusion - Add in further nice to know visualisations - If there is time delve into further examination points (data wireframe)

11	Demo Day Prep	- Final touches on presentation - Rehearse presentation!
